

PORTFOLIO DIAGNOSTIC

Understanding every house, room by room

Prepared for CDA Co-Living · an 8-week diagnostic across the portfolio.

ENGAGEMENT DETAILS

PREPARED FOR	CDA Co-Living
PREPARED BY	DRKA
ENGAGEMENT	Portfolio Diagnostic
DURATION	8 weeks
DATE	June 2026

OVERVIEW

You manage a large co-living portfolio. You know it by area and by impression. You do not yet know it house by house, or room by room.

This engagement gives you that. We take the last 12 months of your own data from Asana and Respond.io and turn it into one clear read of how every house performs. How long people stay against the lease they signed. How long rooms sit empty. Where turnover is hiding the real picture. What tenants are raising, and how long it takes to resolve.

The read is built from the ground up, house by house, so you can see which houses to focus on and why.

THE PROBLEM

This is not a technology problem. The data already exists. It sits across tasks, tickets and chat threads, and no one has pulled it together, so decisions get made on impression instead of evidence.

A house can look full while tenants churn straight through it. People leave early and the reason is unclear. Each house is its own building, with its own condition and its own tenants, so judging them as a block hides the truth.

WHAT WE DO

We bring together three sources you already own: Asana (Move-In, Move-Out and Maintenance) and Respond.io (your tenant WhatsApp conversations).

From these we rebuild the last 12 months for every house and every room, calculate the measures below, and review the data closely. Where something looks off, we check it with your team rather than guess, so the final picture is one you trust.

MEASURE	WHAT IT TELLS YOU
Stay length	Lease signed against time actually lived. Average, spread and outliers.
Vacancy	How long each room sits empty between one tenant leaving and the next arriving.
Turnover	How often a room changes hands, and which houses run hot.
Occupancy	Real occupancy, flagged where a full house is only being held up by high turnover.
Maintenance	Common issue types, when they happen, split by seriousness.
Tenant signal	What tenants raise on WhatsApp, how often they respond, linked to tickets where the two connect.
Area read	Once every house is in, houses are grouped and compared. Averages, outliers, and the area view built from the houses.

WHAT YOU GET

The raw data	Every house and room, rebuilt over 12 months.
The dashboard	The simple overview. Open it and see how every house is doing at a glance.
The report	The full read per house and room, the patterns across the portfolio, and a clear list of which houses to focus on and why.
The area analysis	Splitting houses by area distinction to give you area-level metrics and outliers.

This is a single snapshot of where the portfolio stands today, not a system to maintain. All assets created in this project will be the property of CDA Co-Living.

RESOURCES

We dedicate one resource to this engagement for its full duration.

HOW THE 8 WEEKS RUN

A diagnostic like this would normally take longer to stand up. We have already started, and a good part of the internal pipelines and metrics are built, so the build phase here is two weeks rather than the usual longer setup.

STAGE	WHAT HAPPENS	WHAT YOU SEE
Weeks 1 & 2	We continue the build, connect the data, rebuild the timelines and check the numbers.	Foundation, no deliverable yet
Week 3	First set of houses delivered as data and dashboard, so you can react early.	CDA Report
Week 5	Second set of houses delivered, refined with your feedback on the first.	CLS NSW Report
Week 8	Remaining houses delivered, full analysis completed, Transformation Roadmap presented.	CLS VIC Report + Area-level analysis + Transformation Roadmap

WHAT DONE LOOKS LIKE

This works when CDA can look at the portfolio and clearly see which houses to focus on, on three signals:

Turnover	Houses are churning tenants faster than they should.
Maintenance	Houses carrying more issues, or slower to resolve them.
Vacancy	Rooms sitting empty longer than they should.

THE TRANSFORMATION ROADMAP

Every DRKA engagement closes with a Transformation Roadmap. For this one it sets out what we found, what it is costing, and what to do next, including the specific houses to act on.

INVESTMENT

A fixed weekly fee across the 8 weeks.

WEEKLY FEE \$500	DURATION 8 weeks
---------------------------------------	---------------------------------------

NEXT STEP

If this fits, we confirm the fee, agree a start date, and begin. The first houses are in your hands by week 3.

ACCEPTANCE

By signing below, both parties confirm their agreement to the scope, timeline and fee set out in this proposal. A signed copy from each side confirms the engagement and its start date.
